MOLECULAR PHOTOCHEMISTRY, 9(6), 509-514 (1979)

SUBJECT INDEX TO VOLUME 9

A

Absorption spectra, of Z isomers of naphthyl analogues of benzylideneaniline and triarylazomethines, 309-323
Acetonitrile, radical formation in flash photolysis of aminopyridines in, 171-181
Acetylenes, kinetic study of quenching of excited singlet states of carbonyl compounds by, 325-344
Adduct, tropone-cyclopentadiene, concentration-dependent fluorescence of and implication for formation of photodimers, 93-109
Alcohols, radical formation in flash photolysis of aminopyridines in, 171-181
Aliphatic halogen compounds, induction of singlet-triplet intersystem crossing in 1,2 bispyridylethylene salts by, 157-169
Alkenes, photochemical properties of excited states of in solution, 39-65
3-Aminocrotonic acid-ethylester, spectroscopic study of influence of ultraviolet light on, 295-301
Aminopyridines, radical formation in flash photolysis of in various solvents, 171-181
Amount of bend, determination of adequacy of as parameter for analyzing Stern-Volmer plots, 367-372
Anthracene, fluorescence yield as function of pressure in intersystem crossing in, 257-275
Association complexes, role of in heavy atom quenching of polar excited states, 157-169
Azoalkane, comparisons of photochemical, oxygen catalyzed, and temperature dependent population of triplet states of, 111-118
Azomethines, diaryl- and tricryl-, photoformation of Z (cis) isomers in, 309-323
Azoxybenzenes, utility of photochemical reduction of nitroaromatics to, 213-216

B

Benzene, mechanistic study of photochemical cycloaddition of to 1,3-dioxoles and 1,4-dioxene using emission spectroscopy, 119-156
Benzil bis-phenylhydrazone, photochemical isomerization of, 501-504
Benzyldieneaniline, naphthyl analogues of, direct and sensitized isomerization of and absorption spectra of their Z isomers, 309-323

Bicylo [3.3.1] nonan-9-one system, effect of temperature on photodecarbonylation of, 345-359
2,6-Bis (aminomethyl) napththalenes, effects of N-methylation and viscosity on intramolecular exciplex fluorescence in, 243-256
1,2 Bispyridylethylene salts, induction of singlet-triplet intersystem crossing in by aliphatic halogen compounds, 157-169

C

Cadmium resonance radiation, quenching of by cyclic amines, 277-294
Carbonyl compounds, kinetic study of quenching of excited singlet states of by acetylenes, 325-344
Catalyzed rearrangements, of 1,2-dioxetane ring system, 1-37
Chemically induced dynamic nuclear polarization. See CIDNP
Chemiluminescence, of 1,2-dioxetane ring system, 1-37
CIDNP studies, dynamic, light pulsing device for, 303-305
Cooling, immersion well, heat exchanger for, 381-382
Curing, UV, 307
Cyclic amines, quenching of cadmium resonance radiation by, 277-294
Cyclization, of 1-phenyl-2-(2-benzo[c]phenanthryl)ethylene, 67-81
Cycloaddition, photochemical, mechanistic study of, of benzene to 1,3-dioxoles and 1,4-dioxene using emission spectroscopy, 119-156
3,5-Cycloheptadienones, fluorescence decay measurements and reactivity data of, 83-91
Cycloheptatrienes, arylsubstituted, electronic spectra of, related to photochemical reactivity, 443-461
Cyclohexane, radical formation in flash photolysis of aminopyridines in, 171-181

D

α,β-Dicyanostilbene, photocyclization, oxidation, and spontaneous vs. photoinduced hydrogen shifts of, 217-225
1,4-Dioxene, mechanistic studies of photochemical cycloaddition of benzene to, using emission spectroscopy, 119-156
1,2-Dioxetane ring system, chemistry of including chemiluminescence, fragmentations, and catalyzed rearrangements, 1-37
1,3-Dioxoles, mechanistic studies of photochemical cycloaddition of benzene to, using emission spectroscopy, 119-156

E

Electronic structure, of 5-substituted pyrimidine derivatives, 403-442
Exciplex fluorescence, intramolecular, effects of N-methylation and viscosity on, in 2,6-bis (aminomethyl) naphthalenes, 243-256
Excited singlet states, kinetic study of quenching of, of carbonyl compounds by acetylenes, 325-344
Excited state geometries, of 3-penten-2-one, 227-242

Excited states
photochemical properties of, of alkenes in solution, 39-65
polar, role of association complexes in heavy atom quenching of, 157-169

F

Fe^{+2} and Fe^{+3} ions, effect of on formation and decay of semithionine in ferrous-thionine system by flash photolysis, 183-204
Ferrocene, effect of on photoreactions of flavanone, 383-402
Ferrous-thionine system, effect of Fe^{+2} and Fe^{+3} ions on formation and decay of semithionine in, by flash photolysis, 183-204
Flash photolysis
effect of Fe^{+2} and Fe^{+3} ions on formation and decay of semithionine in ferrous-thionine system by, 183-204
of aminopyridines in various solvents, radical formation in, 171-181
Flavanone, effect of ferrocene or phenylmercuric acetate on photoreactions of, 383-402
Fluorescence, concentration dependent, of tropone-cyclopentadiene adduct and implication for mechanism of formation of photodimers, 93-109
Fluorescence decay, measurement of for 3,5-cycloheptadienones, 83-91
Fluorescence yield, related to pressure in intersystem crossing in anthracene, 257-275
Fragmentations, of 1,2-dioxetane ring system, 1-37

H

Heat exchanger, for immersion well cooling, 381-382
Hydrogen shifts, spontaneous and photo-induced, of α,ß-dicyanostilbene, 217-225

I

Intersystem crossing
fluorescence yield as function of pressure in, in anthracene, 257-275
singlet-triplet, induction of in 1,2 bispyridylethylene salts by aliphatic halogen compounds, 157-169
Irradiation, ultraviolet, influence of intensity of on photoinduced ketonization, 463-471
Isomerization
direct and sensitized, of naphthyl analogues of benzylideneaniline and triarylazomethines and absorption spectra of their Z isomers, 309-323
of 1-phenyl-2-(2-benzo[c]-phenanthryl) ethylene, 67-81
photochemical, of benzil bisphenylhydrazone, 501-504
Z Isomers, of naphthyl analogues of benzylideneaniline and triarylazomethines, absorption spectra of, 309-323
Z (cis) Isomers, photoformation of in diaryl- and triarylazomethines, 309-323

K

Ketones
photochemistry of, in solution

[Ketones, photochemistry of] including concentration-dependent fluorescence of tropone-cyclopentadiene adduct and implication for mechanism of formation of photodimers, 93-109
including fluorescence decay measurements and reactivity data of 3,5-cycloheptadienones, 83-91
Ketonization, photoinduced, influence of the intensity of ultraviolet irradiation on, 463-471

L

Leucomalachite green, photoperoxidation of, 201-211
Light device, pulsing, for dynamic CIDNP studies, 303-305

M

Malachite green, photoperoxidation of, 205-211
Mechanistic study, of photochemical cycloaddition of benzene to 1,3-dioxoles and 1,4-dioxene using emission spectroscopy, 119-156
N-Methylation, effect of in intramolecular exciplex fluorescence in 2,6-bis (aminomethyl) naphthalenes, 243-256

N

Nitroaromatics, photochemical reduction of to azoxybenzenes, utility of, 213-216
Nitromethane, ultraviolet pulse photolysis of, 473-499
N-Nitroso-N-methylaniline, photolysis of, 361-365
Nuclear polarization, chemically induced dynamic. See CIDNP

O

Oxidation
of α,β-dicyanostilbene, 217-225
of 1-phenyl-2-(2-benzo[c]-phenoanthryl) ethylene, 67-81
Oxygen catalyzed population, of triplet states of azoalkanes, comparison of with photochemical and temperature dependent methods, 111-118

P

3-Penten-2-one, photoisomerization and excited state geometries of, 227-242
1-Phenyl-2-(2-benzo[c]phenanthryl) ethylene, photochemistry of including isomerization, cyclization, intramolecular proton transfer, and oxidation, 67-81
Phenylmercuric acetate, effect of on photoreactions of flavanone, 383-402
Photochemical population, of triplet states of azoalkanes, comparison of with oxygen catalyzed and temperature dependent methods, 111-118
Photochemical properties, of excited states of alkenes in solution, 39-65
Photochemical reduction, of nitroaromatics to azoxybenzenes, utility of, 213-216

Photochemistry
analysis of publications in, 373-380
of 1-phenyl-2-(2-benzo[c]phenanthryl) ethylene, 67-81
Photocyclization, of α,β-dicyanostilbene, 217-225
Photodecarbonylation, effect of temperature on of bicyclo-[3.3.1]nonan-9-one system, 345-359
Photodimers, concentration-dependent fluorescence of tropone-cyclopentadiene and implication for mechanism of formation of, 93-109
Photoformation, of Z (cis) isomers in diaryl- and triaryl-azomethines, 309-323
Photoisomerization, of 3-penten-2-one, 227-242
Photoketonization. See Ketonization, photoinduced
Photolysis
of N-nitroso-N-methylaniline, 361-365
ultra-violet pulse, of nitromethane, 473-499
Photoperoxidation of malachite green and leucomalachite green, 205-211
Photoreactions, of flavanone, effect of ferrocene or phenylmercuric acetate on, 383-402
Photoreactivity, of 5-substituted pyrimidine derivatives, 403-442
Population, comparisons of photochemical, oxygen catalyzed, and temperature dependent methods of, of triplet states of azoalkanes, 111-118
Pressure, related to fluorescence yield in intersystem crossing in anthracene, 257-275
Proton transfer, intramolecular, of 1-phenyl-2-(2-benzo[c] phenanthryl) ethylene, 67-81
Publications, analysis of in photochemistry, 373-380
Pyrimidine derivatives, 5-substituted, electronic structure, photoreactivity, and UV-spectroscopic properties of, 403-442

Q

Quenching
by acetylenes, kinetic study of, of excited singlet states of carbonyl compounds, 325-344
heavy atom, of polar excited states, role of association complexes in, 157-169
of cadmium resonance radiation by cyclic amines, 277-294

R

Radical formation, in flash photolysis of aminopyridines in various solvents, 171-181
Reactivity, photochemical, electronic spectra of aryl-substituted cycloheptatrienes, related to, 443-461
Reactivity data, of 3,5-cycloheptadienones, 83-91

S

Semithionine, effect of Fe^{+2} and Fe^{+3} ions on formation and decay of in ferrous-thionine system by flash photolysis, 183-204
Solution
photochemical properties of excited states of alkenes in, 39-65
photochemistry of ketones in, 83-91; 93-109
Specialist Periodical Report, photochemistry, 505

Spectra, electronic, of arylsubstituted cycloheptatrienes, related to photochemical reactivity, 443-461
Spectroscopy
  emission, mechanistic studies of photochemical cycloaddition of benzene to 1,3-dioxoles and 1,4-dioxene using, 119-156
  study of influence of ultraviolet light on 3-aminocrotonic acid-ethylester and its N-substituted derivatives by, 295-301
Stern-Volmer plots, determination of adequacy of amount of bend as parameter for analyzing, 367-372
N-Substituted derivatives of 3-aminocrotonic acid-ethylester, study of influence of ultraviolet light on by spectroscopy, 295-301

T

Temperature, effect of on dual photodecarbonylation of bicyclo[3.3.1]nonan-9-one system, 345-359
Temperature dependent population, comparison of with photochemical and oxygen dependent methods of triplet states of azoalkanes, 111-118
Triarylazomethines, direct and sensitized isomerization of and absorption spectra of their Z isomers, 309-323
Triplet states, azoalkane, comparisons of photochemical, oxygen catalyzed, and temperature dependent population of, 111-118
Tropone-cyclopentadiene adduct, concentration-dependent fluorescence of and implication for mechanism of formation of photodimers, 93-109

U

Ultraviolet light, study of influence of on 3-aminocrotonic acid-ethylester and its N-substituted derivatives by spectroscopy, 295-301
Ultraviolet spectroscopic properties, of 5-substituted pyrimidine derivatives, 403-442
UV curing, 307

V

Viscosity, effect of on intramolecular exciplex fluorescence in 2,6-bis(aminomethyl) naphthalenes, 243-256

W

Water, radical formation in flash photolysis of aminopyridines in, 171-181

MOLECULAR PHOTOCHEMISTRY, 9(6), 515-518 (1979)

COLLECTIVE CONTENTS TO VOLUME 9

Volume 9, Number 1, 1978-79

Editorial Announcement iii

Chemistry of the 1,2-Dioxetane Ring System. Chemiluminescence, Fragmentations, and Catalyzed Rearrangements 1
K. A. Horn, J.-Y. Koo, S. P. Schmidt, and G. B. Schuster

Photobehavior of Alkenes in Solution 39
P. J. Kropp

The Photochemistry of 1-Phenyl-2-(2-benzo[C]phenanthryl) Ethylene: Isomerization, Cyclization, Intramolecular Proton Transfer and Oxidation 67
T. Wismontski-Knittel and E. Fischer

Photochemistry of Ketones in Solution. 54. Fluorescence Decay Measurements and Reactivity Data of 3,5-Cycloheptadienones 83
J. Eriksen and D. I. Schuster

Photochemistry of Ketones in Solution. 55. Concentration-Dependent Fluorescence of the Tropone-Cyclopentadiene Adduct and Its Implication for the Mechanism of Formation of Pnotodimers. 93
D. I. Schuster and V. A. Stoute

Direct Photochemical, Oxygen Catalyzed and Temperature Dependent Population of Triplet States. Applications to the Photochemistry of Cyclic Azoalkanes 111
N. J. Turro, W. R. Cherry, M. J. Mirbach, M. F. Mirbach, and V. Ramamurthy

Volume 9, Number 2, 1979

Photochemical Cycloaddition of Benzene to 1,3-Dioxoles and 1,4-Dioxene. II. Mechanistic Results 119
J. Mattay, H. Leismann, and H.-D. Scharf

The Role of Association Complexes in Heavy Atom Quenching of Polar Excited States. Induction of Singlet-Triplet Intersystem Crossing in 1,2 Bispyridylethylene Salts by Aliphatic Halogen Compounds 157
A. R. Gutierrez and D. G. Whitten

Radical Formation in the Flash Photolysis of Aminopyridines 171
J. Wolleben and A. C. Testa

Flash Photolysis Study of the Ferrous-Thionine System. A New Kinetic Model for Semithionine Decay 183
S. N. Guha, P. N. Moorthy, and K. N. Rao

RESEARCH NOTES

The Photoperoxidation of Unsaturated Organic Molecules. XVIII. Malachite Green and Leucomalachite Green 205
B. Stevens and S. J. Kaplan

The Photochemical Synthesis of Azoxybenzenes 213
L. Mattison and D. O'Dell

Volume 9, Numbers 3 & 4, 1979

Photoinduced Reactions of α,β-Dicyanostilbene: Photocyclization, Oxidation, and Spontaneous vs Photoinduced Hydrogen Shifts 217
T. Wismontski-Knittel, K. A. Muszkat, and E. Fischer

Photoisomerization and Excited State Geometries of 3-Penten-2-one. 227
J. F. Graf and C. P. Lillya

Intramolecular Exciplex Fluorescence in 2,6-Bis(aminomethyl)-naphthalenes: Effects of N-Methylation and Viscosity 243
J. A. Ibemesi and M. A. El-Bayoumi

Intersystem Crossing in Anthracene. A Pseudostatistical Case? 257
S. J. Formosinho and A. M. da Silva

Quenching of the Cadmium Resonance Radiation at 326.1 nm by Some Cyclic Amines. 277
S. Yamamoto, M. Yasunobu, N. Nishimura, and S. Hasegawa

Influence of Ultraviolet Light on 3-Aminocrotonic Acid-ethylester and Its N-Substituted Derivatives. Spectral Evidence for a Photoinduced Hydrogen Transfer. 295
P. Markov, I. Petkov, and M. Arnaudov

A Light Pulsing Device for Dynamic CIDNP Studies. 303
J. W. M. deBoer and J. K. S. Wan

Book Review 307

Volume 9, Number 5, 1979

Photoformation of "Z" (CIS) Isomers in Diaryl- and Triaryl-Azomethines. III. Direct and Sensitized Isomerization of Naphthyl Analogues of Benzylideneaniline and of Some Triarylazomethines, and Absorption Spectra of Their Z Isomers 309
K. Maeda and E. Fischer

Interaction of Carbonyl Excited Singlet States with Acetylenes 325
L. E. Friedrich, M. A. Hamilton, and J. C. Dalton

Thermal Probes of Ketone Photochemistry. Dual Photodecarbonylation Mechanisms in the Bicyclo[3.3.1]Nonan-9-One System 345
D. S. Weiss and J. A. Sauter

Photolysis of N-Nitroso-N-Methylaniline 361
Y. L. Chow and K. Hanaya

The "Amount of Bend" as a Criterion of Nonlinearity in Stern-Volmer Plots 367
O. M. Valdes Aguilera

An Analysis of the Publications in the Field of Photochemistry 373
D. E. Nicodem

A Simple Heat Exchanger for Immersion Well Cooling 381
L. M. Tolbert and W. C. Mateyka

Volume 9, Number 6, 1979

Additive Effects on the Photoreactions of Flavanone 383
H. Nakamichi and R. Matsushima

Electronic Structure, Photoreactivity and UV-Spectroscopic Properties of Some 5-Substituted Biological Pyrimidine Derivatives 403
A. V. Borodavkin, Yu. S. Dolin, Yu. V. Morozov, and F. A. Savin

Photochemistry of Substituted Cycloheptatrienes. X. The Interpretation of the Electronic Spectra of Arylsubstituted Cycloheptatrienes and the Relations to the Photochemical Reactivity 443
W. Paulick, W. Abraham, Ch. Jung, and D. Kreysig

Influence of the Intensity of the Ultraviolet Irradiation on the Course of Photoketonization 463
W. Majewski, W. Skubiszak, T. Kotowski, S. Dinev, P. Markov, and I. Petkov

Preliminary Investigation of the Ultra-Violet Pulse Photolysis of Nitromethane 473
G. R. Haugen and L. L. Steinmetz

Photochemical Isomerization of Benzil Bis-Phenylhydrazone 501
A. S. Orahovats, N. J. Christova, and A. W. Spassov

Book Review 505

Author Index to Volume 9 507

Subject Index to Volume 9 509
